Drupal version 9

Yes, it’s true.

We are updating the School of Medicine’s website from Drupal v.7 to Drupal v.9.

THE BEST PART?!?!
DRUPAL 7 (D7) content is copied to DRUPAL 9 (D9)

• Audit your D7 websites NOW

• UPDATE OLD CONTENT

• UNPUBLISH EXPIRED CONTENT

• Zoom meetings are being scheduled to help you get started. Check your Tulane email.
Before creating new content in D9
Edit existing D9 pages

1. Review/compare your current D7 website with the new Drupal 9 website.

2. Edit the D9 page so the content matches what is on the D7 page.

3. From now until the deadline, any changes made to your public D7 website must also be replicated in the D9 website.
DEADLINE is AUGUST 1

You heard the word,
The DEADLINE to complete auditing and editing your D9 website is August 1.

• After that, we are switching to D9 and there is no going back.
• You’ll only have to work on the D9 website then.
Log in to Both the D7 and D9 SOM Websites

• You can now use Firefox or Chrome to edit the website

• Hint: Open D7 in Firefox & D9 in Chrome as you compare and edit, so you don’t confuse the two
REPORT Website Issues & Bugs

• https://airtable.com/shrt4G9OSCUZ0WPGC

• Report any D9 content that is missing, isn’t formatted or performing the way it did before, using the reporting form link above.

• Tulane’s Office of Communications & Marketing will work to resolve your issue.
Drupal 9 Resources

Drupal 9 is designed to be more user friendly. You can most likely find the answers to any questions in the easy to use Drupal 9 Guide.
