We're excited to announce that new white coats/lab coats are now available for ordering through your departments! The coats now feature the updated logo options – both Tulane Medicine and Tulane Doctors - that proudly represent Tulane's commitment to innovation and excellence in healthcare and scientific discovery. Anyone in the School of Medicine community can choose the Tulane Medicine logo, while the Tulane Doctors logo is for physicians.

The coats are sold and distributed through the Hutchinson Memorial Building stockroom. Designed with style, functionality, and durability in mind, the coats are made from high-quality materials to ensure comfort and durability for our physicians and scientists. There are two options for the new coats: 100% cotton or a poly/cotton

blend. In addition to the logos, you can also include up to three lines of embroidered text with your name, title, and department/section. Each order is submitted via a requisition by each department or section using the Sciquest/eProcurement system through your administrators.

The invoice will be emailed to Accounts Payable from TLC when the coats arrive in the Linen Room. The coats ordered will be delivered to the Linen Room (1430 Tulane Ave., Room 1101), and the Linen Room will contact the person on the requisition/form attached to the requisition to tell them that the coat can be picked up.

The new coats are available in a variety of sizes to accommodate our community members' fit preferences, and the size chart and price list are easily available on the order form.
