September 13, 2024 4:00 PM

In a groundbreaking opportunity for healthcare innovators and AI enthusiasts, the Tulane AI & Healthcare Design Lab has officially opened its application cycle. This intensive workshop, slated for November 14-17, 2024, promises to immerse up to 32 top applicants in the Biodesign methodology, with a unique focus on leveraging artificial intelligence to build the future of medicine - be sure to apply by October 1st!

About the Design Lab

A collaboration between Tulane University and the Alliance for AI in Healthcare, the AI & Healthcare Design Lab is not just a learning experience—it's a catalyst for change in the healthcare industry. Participants, including undergraduate and graduate students, medical students and residents, post-docs, young professionals, and law and business students, will gain hands-on experience and practical problem-solving skills. The lab is designed to equip attendees with the tools and knowledge needed to harness AI to address pressing healthcare issues.

What to Expect

Participants will engage in various activities, including:

- **Real-World Problem Solving:** Teams will develop solutions considering factors such as data availability, algorithm selection, and ethical implications.
- **Mentorship and Feedback:** Guided by experienced mentors and industry experts, participants will refine their concepts and receive invaluable feedback.
- **Dynamic Pitch Session:** The event culminates in a pitch session where teams present innovative solutions to a panel of leading venture capitalists.

Developing Healthcare Innovators

This event is more than just a workshop. It's an opportunity to enhance career prospects through insights into the Stanford Biodesign Process, connect with leaders in AI and healthcare, and collaborate with diverse minds from across the country.

Participants will gain:

- **Insights into the Stanford Biodesign Process:** A methodology that enhances career prospects through expert knowledge.
- **Networking Opportunities:** Connect with leaders in AI and healthcare.
- **Access to a Collaborative Environment:** Participants can foster groundbreaking ideas by accessing diverse minds from across the country.... and the world.

How to Apply

Applications are due by October 1st, 2024. [APPLY NOW](#), and don't miss this chance to be part of a revolutionary experience that could shape the future of healthcare.
