BioRender Premium is now available for all Tulane employees and students. The software can be used to create high-quality scientific figures and diagrams. (Art created in BioRender by Carolyn Scofield)

BioRender, a powerful tool for creating high-quality scientific figures and diagrams, is now free for all faculty, staff, and students. BioRender simplifies the process of visualizing complex scientific concepts with its extensive library of icons and templates, making it an essential resource for academic presentations, publications, and educational materials.

Whether working on a research project, preparing a lecture, or enhancing a presentation, BioRender allows users to create professional, accurate, and visually engaging illustrations easily. Access is free through Tulane's institutional license, which offers unlimited access to BioRender's premium features.

If you purchased a BioRender account on your own, you can cancel your current subscription and submit for a reimbursement. Access your free Tulane BioRender Premium account using your existing account details once you cancel your current subscription.

Tulane Information Technology is holding a special Tulane edition of BioRender 101 on Wednesday, October 16, from 1 to 2 p.m. Learn actionable tips and techniques for designing science figures for your posters, presentations, publications, and more. To register, [click here](#).
