

Founded nearly 200 years ago by physicians responding to a yellow fever epidemic, Tulane University School of Medicine remains one of the nation's most recognized centers for medical education. TUSOM is a vibrant center for education, research and public service. As the second oldest medical school in the South and the 15th oldest medical school in the United States, TUSOM maintains more than 20 community student-led clinics throughout New Orleans, providing quality healthcare to the underserved population. Leading groundbreaking work in infectious diseases, cardiovascular health, cancer, and Neuroscience, TUSOM continues to shape the future of medicine both locally and globally.

CLASS OF 2030

- ⇒ 15, applicants for 190 seats
- ⇒ Gender: 110 female, 80 male
- ⇒ Age: average=24 (range 20-41)
- ⇒ MCAT=509
- ⇒ Average GPA=3.71
- ⇒ 84 schools and college represented
- ⇒ 52 from Tulane
- ⇒ 36 states, 7 countries represented
- ⇒ 10 1st Generation in College
- ⇒ More than 273,600 hours of research and community service

SPECIAL PROGRAMS

- ⇒ DeBakey Scholars Program - research projects are begun early in medical school and culminate with publications and special recognition
- ⇒ Aspire Research Program- provides stipends for students to conduct research in the summer between their T1 and T2 years
- ⇒ MD/MBA Program - 4 or 5 year program
- ⇒ MD/MPH Program - 4 or 5 year program
- ⇒ MD/MS Bioethics and Medical Humanities - 4 year program
- ⇒ Physician/Scientist Program - combined MD/PhD program
- ⇒ Tulane Medical School Business Proposal Competition/ Technology and Innovation - the only Business proposal competition in a medical school

LEARNING ENVIRONMENT

Tulane Center for Advanced Medical Simulation and Team Training (Sim Center)

- ⇒ Designed to train students, residents and faculty using both high fidelity simulators as well as Crew Resource Management (team training).
- ⇒ Enables all healthcare professionals, medical students, residents, nurses, faculty physicians and technicians to practice and perfect technique in a safe environment.
- ⇒ The Tulane Sim Center features 14,000 square feet of real-life environments:
 - * ER and Intensive Care Unit
 - * Operating Room
 - * Labor and Delivery
 - * 3 Hospital Rooms
 - * 4 Clinic Exam Rooms

Golding Teaching Kitchen

- ⇒ Designed to educate physicians, residents and partnering culinary students
- ⇒ Features a state-of-the-art kitchen and onsite garden to better understand the impact of diet on health and the role of nutrition in disease prevention.

DeBakey and Leone Educational Center

- ⇒ Designed to facilitate Team-Based Learning (TBL)
- ⇒ Each contains the latest multi-media presentation equipment and sound and is surrounded by 65 inch LCD flat screens and large Smartboards™.

Life In New Orleans

One trip to New Orleans and you'll realize this city is unlike any you've visited. Whether you're enjoying the cuisine, nightlife or architecture in the historic French Quarter, visiting the National World War II museum, or taking a ride on the city's famous streetcar trolley on St. Charles Avenue, New Orleans has something for you to experience every day. One trip and you'll realize why locals hold this city

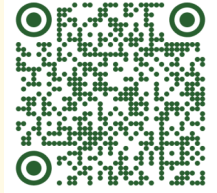

Medical Student Education

The primary mission at Tulane University School of Medicine is to conduct the highest quality educational programs, which will result in academically and clinically prepared physicians, biomedical scientists and public health professionals.

* The curriculum is designed to prepare future physicians with the knowledge, skills, and behaviors required for any specialty field they choose. The pre-clinical curriculum is taught as a series of system-based modules, where Phase 1 focuses primarily on normal structure and function and Phase 2 is primarily focused on applying that knowledge to the pathophysiology, pathogenesis, etiology and treatment of disease states. Students begin learning clinical skills early in Year 1. Specialty based clinical training begins Year 2 and continues throughout most of Year 3. The final phase of the curriculum is designed to help students choose and prepare for their residency choice.

* The curriculum provides enough flexibility for early and opportunities in service-learning, dedicated time for students interested in dual degrees (MPH, MS, MBA), or mentored research and global experiences.

Student Life at TUSOM

Outside of the classroom, TUSOM students have an opportunity to become involved in a variety of opportunities and experiences. From a student's physical and mental well-being to enhancing their academic experience and their career, TUSOM supports their students throughout their medical education journey. These experiences allow students to continue to follow the passions they had before they started medical school and help develop leadership and assist with the development of the competence needed to provide exceptional clinical care and service to the community.

Some of these experiences include our Student Run Clinics, our Lagniappe Literature and Art Magazine, Music and Medicine, and Tulane Med Wellness.

Justin Evans, Class of 2026 "The faculty goes above and beyond to make sure we are taken care of. I wouldn't want to do this journey anywhere else."

Nate Smith, Class of 2028 "The principles of Tulane University School of Medicine really align well with integrity, service and excellence."
