Rush Summer Research Scholars Program

Are you interested in a career in medicine?

Research at Rush is unique because we work on projects beyond the basic sciences. As a member of the inaugural class of Rush Summer Research Scholars, you will work on a project in translational, clinical or community research. Your work will be guided by faculty mentors, as well as current medical and graduate students. At the end of the program, you will present your final project outcomes to the Rush scientific community.

All summer research scholars will participate in weekly activities to help prepare for applying to medical school including career advising, admissions workshops, community service, and more. You will also earn a $3,000 stipend for living expenses so you can explore the city of Chicago in your spare time.

Dates
July 8-August 16, 2019

Program Eligibility
- Students from disadvantaged backgrounds and/or who are known to be underrepresented in medicine and health-related sciences
- College juniors, seniors (rising or graduating), and current students or graduates of a post-baccalaureate program in the basic sciences
- U.S. citizens, permanent residents, or students with Deferred Action for Childhood Arrival (DACA) status
- Minimum cumulative GPA of 2.8
- Ability to reside in the Chicago area for the duration of the program

Application Deadline
April 15, 2019
