COVID-19 Simulation Safety Plan

Until further notice, the following policies apply to all Tulane Sim Center sessions, courses, and assessments. If you have any concerns, contact Jennifer Calzada, Director for Simulation at jcalzada@tulane.edu.

FIVE PILLAR SIMULATION SAFETY PLANS

1. **Masks must be worn in all common and simulation areas.**
   - Entering the Murphy Building, elevators, stairwells, hallways, and bathrooms.
   - During all hands-on simulation, unless you are alone.
   - Cloth reusable masks are acceptable, and we ask that participants bring one, if available.
   - Some hands-on simulation may also require gloves.

2. **Temperature check upon arrival at the Sim Center.**
   - Forehead contactless temperature check.
   - Anyone registering 100.4F or greater will have to leave the building immediately and should contact their healthcare provider.

3. **Wash or sanitize hands both before participating in hands-on simulation and after hands-on simulation.**

4. **Special room capacity limits.** Rooms are marked with capacity limits and some have floor markers that allow social distancing.

5. **Enhanced and frequent cleaning and disinfecting by both Tulane housekeeping and Sim Center staff after and in between all sessions.**

Upon arrival and after a temperature check, you will be directed to a room. Please follow all directions from staff, keep your mask on when directed, wash and sanitize your hands frequently, and keep all personal items, **including cell phones**, out of simulation rooms at all times. Lockers are available.

Contact the Tulane Sim Center at simcenter@tulane.edu or 504-988-9150.
