National Minority Health Month spotlights disparities in health equity

National Minority Health Month is observed every April to underscore the importance of improving health outcomes for racial and ethnic minority groups. **Jacquelyn Turner, MD**, Vice Chair of Surgical Education and Section Chief for Colon and Rectal Surgery, says this month of awareness highlights the need to address health disparities in all fields of medicine.

“National Minority Health Month starts the conversation, it makes people aware,” says Turner. “Something I’ve noticed, especially in the last two years of the pandemic, is that we’re talking about health equity more and better recognizing how this affects all of us. I hope that recognition leads to action.” [Read more here.](#)
