New test uses nanotechnology, artificial intelligence to diagnose TB in children

Senior study author Tony Hu, PhD, Weatherhead Presidential Chair in Biotechnology Innovation, is working with colleagues to streamline the new TB test so it can be performed in the community and read with a smartphone.

“TB is a disease found primarily in resource-limited areas, the ideal is to create a smartphone-based method that could be used at the point-of-care in these settings,” said Hu.

[Read more about the research here.](#)
