

2014-2015 Diabetes Research Seminar Series

Seminars related to diabetes and metabolic diseases

May 28, 2015 - *The impact of bone on whole body organism physiology.*

Gerard Karsenty, MD, PhD, Columbia University

Tulane Diabetes Research Program and DW Mitchell Lecture

May 4, 2015 - *The Hyperbolic Relationship Between Insulin Action and Insulin Response: Why Does It Happen and What Does It Mean?*

Richard Bergman, PhD, Cedars-Sinai Medical Center, LA

Physiology and Endocrinology Seminar Series

April 13, 2015 - *Type 2 diabetes: An old disease with evolving paradigms.*

Jason K. Kim, PhD, University of Massachusetts

Department of Physiology seminar

February 26, 2015 - *CNS control of systemic metabolism.*

Christoph Buettner, MD, Mount Sinai School of Medicine

Neuroscience and Tulane Diabetes Research Program seminar series

October 9, 2014 - *Gene-Environment interactions in the pathogenesis of diabetes and metabolic syndrome.*

C. Ronald Kahn, MD Joslin Diabetes Center and Harvard Medical School

Tulane Diabetes Research Program Special Lecture

October 2, 2014 - *Cerebral Ischemic Damage in Diabetics.*

Kujan R. Dave, MD, University of Miami, Miller School of Medicine

Neuroscience Program seminar series

September 24, 2014 - *Role of novel tissue-selective estrogen complexes in energy homeostasis.*

Franck Mauvais-Jarvis, MD, PhD, Department of Medicine, Section of Endocrinology, Tulane University School of Medicine

Department of Structural and Cellular Biology Seminar Series

September 22, 2014 - *Obesity paradox, aging and contribution of physical activity and fitness.*

Carl "Chip" Lavie, MD, Ochsner Heart and Vascular Institute.

Aging Seminar Series
