

## Seminars FY 2015-2016

**February 25, 2016 - *Immunology of type 1 diabetes.***

**Matthias Von Herrath , MD**, La Jolla Institute of Allergy and Immunology  
Tulane Diabetes Research Program Lecture

**February 18, 2016 - *GLP-1 physiology in glucose homeostasis.***

**David D'Alessio, MD**, Duke University Medical Center  
Tulane Diabetes Research Program Lecture

**February 4, 2016 - *Novel mechanisms of obesity.***

**Christian Vaisse, MD**, University of California, San Francisco  
Aging Center Seminar Series

**Thursday, January 13, 2016 - *Molecular and neural mechanisms of leptin action.***

**Martin Myers, MD, PhD**, University of Michigan  
Neuroscience Program seminar series

**December 2, 2015 - *Central mechanism of metabolic dysfunction in women with androgen excess .***

**Franck Mauvais-Jarvis, MD, PhD**, Tulane Health Sciences Center  
Neuroscience Program seminar series

**September 24, 2015 – *Novel mechanisms of Insulin secretion revealed with metabolomics.***

**Christopher Newgard, PhD**, Duke University Medical Center.

Endocrine Society Visiting Professor Program  
Tulane Diabetes Research Program Lecture

**September 23, 2015 - *Metabolomics applied to dysfunctional metabolism in diabetes.***

**Christopher Newgard, PhD**, Duke University Medical Center.

Endocrine Society Visiting Professor Program  
Medicine Grand Round
