Researchers collaborate with USDA

Matthew Burow, PhD, is Tulane's leader on a project that explores if activated foods - ones that are rich in stress-induced phytoalexins - might play a role in the regulation of human health and disease.

The research is funded through a cooperative agreement with the U.S. Department of Agriculture, and Burow's team has seen the funding increase from \$400,000 to \$775,000 in the last year.

"As we progress, we hope to develop actual diets that could play a role in preventing cancer in rodent and primate models," said Burow. [Read more here.](#)
