PEER-REVIEWED RESEARCH PUBLICATIONS

Phagocytic response, endotoxin susceptibility, local immunity and DTH response. 

36. Mishra A, Hogan,SP, Brandt,E and Rothenberg ME. Interleukin-5 promotes

47. Brandt, E., Muntel EE, Yamada Y, Pope SM, **Mishra A**, Hogan SP, Rothenberg ME. 2006. The α4β7-integrin is dynamically expressed on murine eosinophils and involved in eosinophils trafficking to the intestine. 2006. **Clinical and Experimental Allergy.** 36(40), 543-47

60. Rituraj Niranjan, Madhavi Rayapudi, Akanksha Mishra, Scott Dynda and Mishra A. 2013. Pathogenesis of allergen-induced eosinophilic esophagitis is independent to Interleukin (IL)-13. *Immunology and Cell Biology.* 91, 408–415;

68. Ibba SV, Mohamed A, Kusma P Matthew R L, Mishra, A and Boulares, AH. Potential of Inducible Nitric Oxide Synthase as a Therapeutic Target for Allergen-Induced Airway Hyperresponsiveness: A Critical Connection to Nitric Oxide Levels and PARP Activity. Potential of Inducible Nitric Oxide Synthase as a Therapeutic. Mediators of Inflammation. 2016; 2016, 1-10

72. Manohar M, Verma AK, Venkateshaiah SU and Anil Mishra. Role of eosinophils in the initiation and progression of pancreatitis pathogenesis. AJP-Gastroenterology and Liver Physiology. 2018; 314(2):G211-G222

78. Manhoar M, Verma A, Kandikattu HA and Mishra A. Interleukin (IL)-15 regulates tissue remodeling and fibrosis in chronic pancreatitis. AJP-Gastroenterology and Liver Physiology 2018 (Revised submitted)

81. Verma AK, Kandikattu HA, Manohar M, Shukla A, Upparahalli Venkateshaiah S, Zhu X and Mishra A. IL-18 overexpression promotes intestinal eosinophilia in endogenous IL-5, IL-13 and eotaxin-1 deficient mice. Immunology 2019 (Revised Submitted)

REVIEW ARTICLES/EDITOREAL

86. Mishra, A. Airway Obstruction and Inducible NO Synthase (iNOS), Chronic Obstructive Pulmonary Diseases. 2016: 1(3)e1
