Events of the Week

Research and patient care activities continue here at the School of Medicine during winter break, and the Downtown Receiving Office will be open limited hours. Click here for the schedule.

The university holiday and winter recess schedule for 2021-2022 can be found here.
School of Medicine employees graduate from Anti-Racism and Emerging Leadership Institutes

Mike Woodson, Dr. Sonia Malhotra, Bennetta Horne and Dr. Cecilia Gambala all recently graduated from the inaugural class of the Tulane University Leadership Institute. Cecilia Gambala, MD, assistant dean of clinical education, and Sonia Malhotra, MD, director of palliative medicine, completed the Anti-Racism Leadership Institute Program. Bennetta Horne, assistant dean for equity, diversity and inclusion, and Mike Woodson, director of admissions, graduated from Tulane’s Emerging Leaders Program.

“It was an incredible, transformative 12-month experience that really taught me so much about promoting Anti-Racism work, racial equity indicators and how to ensure the work of being an Anti-Racist moves forward in our Tulane and New Orleans communities,” said Malhotra. “I’m hoping more School of Medicine faculty are able to go through this course.”
