April 2022 PhD Newsletter

Dissertation Defense

The Hon. Dr. Jack D. Anderson will defend his dissertation titled "Inflammation and Immunity Following Infection or Vaccination in Kids, Adults, or Cancer Patients." If you have any announcements to share in the newsletter, please send them to enorton@tulane.edu.

April Birthdays

Jaikin Harrell            Emily Phillips
Tiffany Kaul               Ferris Munyonho
Lindsey (Pharm), Ricardo Mostany (Pharm), and Andrea Zsombok (Phys) on the Downtown campus.

Call for Papers: "Estrogens, Cardiometabolic Health, and Female Cognitive Aging." Project leaders include Sarah Legendre, M.D., and Lindsey (Pharm), Ricardo Mostany (Pharm), and Andrea Zsombok (Phys) on the Downtown campus.

Multiple postdoctoral positions are available in Dr. Elizabeth Norton’s lab, Department of Microbiology/Immunology. The first is from a newly-funded R01 on mucosal vaccination and predicts of immunity. The second is for a NIH/NCI Seronet Project on SARS-CoV-2 cellular immunopathogenesis of SIV/malaria co-infection in pregnancy. Candidates should have training and background in the following areas: 1). Genetics, molecular/cell biology, biochemistry, and cell signaling; 2). Mouse models of skeletal/metabolic diseases, stem cell biology, and women’s health. For more information contact dr.enorton@tulane.edu.

2. Mouse models of skeletal/metabolic diseases, stem cell biology, and women’s health. For more information contact dr.enorton@tulane.edu.
