Happy
Month!!!

One Postdoc Position

Position: One Postdoc Position

Research Focus:

Biology. Research in the laboratory focuses on novel mechanisms driving prostate cancer progression and therapeutic resistance. A variety of molecular biology, biochemistry, and bioinformatics approaches as well as cell line, xenograft, and GEM models are utilized in this lab. Candidates should have a strong background in molecular biology and biochemistry and experience in animal models of human disease.

Two Postdoc Positions

Position: Two Postdoc Positions

Research Focus:

The Sammarco Lab has a growing the PhD and Master's programs. She gave unconditional support and encouragement to both students and staff. We will miss her greatly, but her legacy will live on through the many students and staff who were impacted by her guidance and mentorship.
